claims
Rule 1.126
M.P.H.

6. (Previously presented) The receiver as claimed in claim ~~11~~¹, wherein said user profile created by said user profile creating means accumulates at least a title, a category and a key word of programs received at every unit time.

7. (Previously presented) The receiver as claimed in claim ~~11~~¹, wherein said virtual channel guide creating means uses user profiles located ahead of and behind said predetermined unit time if user profile information corresponding to said predetermined unit time is not accumulated then when a program of said real channel corresponding to a predetermined unit time is selected.

8-9. (Canceled)

8. ~~10~~ (Previously presented) The receiver according to claim ~~11~~¹, further comprising channel control means for controlling said selecting means in a manner that said real channel selected from said virtual channel guide created by said virtual channel creating means are received sequentially.

1. ~~11~~ (Currently amended) A receiver comprising:
receiving means for receiving a digital broadcast signal;
selecting means for enabling a user to manually select real channel information corresponding to a number of programs from information of a plurality of real channels;

program information extracting means for extracting program information of said plurality of real channels from said digital broadcast signal received by said receiving means;

user profile creating means for creating on the basis of the selected real channel information from said selecting means and said program information extracted by said program information extracting means a user profile in which program information are accumulated as user profile information; and

virtual channel guide creating means for creating a virtual channel guide in which programs are located by utilizing said user profile[;];

wherein said ~~selecting means prevents overlapping of the programs as a function of a consecutive channel changing number and a total virtual channel number~~
virtual channel guide creating means locates a program into a virtual channel only when its corresponding time is not overlapped with any program located in said virtual channel, and shifts to a consecutive virtual channel when overlapped.

9. ~~12.~~ (New) The receiver as claimed in claim ~~11~~¹, further comprising:

a priority program setting means for setting a priority program,

wherein said virtual channel guide creating means gives priority to the priority program set by said priority program setting means in creating the virtual channel guide such that the priority program set by said priority program setting means is located into the virtual channel guide prior to other programs.
